PROJECTS

Frontend views and backend designed for SOSParty

As working in product base company, I am handling frontend designing of official website of SOSParty and handling backend dashboard views of Admin Panel designed in vue.

Easy git

https://github-profile-find.netlify.app/

1. A React application to find people directly who have their GitHub profiles and get their details easily.

2. Easy to fetch users along with their profile images

Connect emoloyee

https://connect-employee.herokuapp.com/login

1. It is a MERN stack application to keep the personal and professional details of the different users.

2. An individual user or an HR can maintain the easy to reach employee details.

Cook bites

https://cook-bites.netlify.app/

1. It is an online recipe application, a platform that provides a number of recipes for your favourite food.

2. It is build in javascript using MVC model

Gupshup

https://gupshupp.netlify.app/

1. Application in react and sockets + nodejs.

2. This application is a chat application where two or more users can talk under the same room.

3. Data is removed when the user logouts

Sky today

https://sky-today.netlify.app/

1. Weather application on react with third party api. It tells about the current weather of the day.

2. It also tells about sunset sunrise timings, speed and humidity.

Note-your-budget

https://note-ur-budget.netlify.app/

1. An application to keep track of day-to-day income and expenses.

2. It is fully built in javascript

Play-my-game

https://play-my-game.netlify.app/

1. It is just a fun game build in Javascript.

2. Two user can play this game .

3. Rules are mentioned in the application

Adavitya 2k19

https://adavitya-2k19.netlify.app/

Official Website for tech-fest 2k19 held at Daviet. It gives the complete information about the two day schedule, list of events and clubs. Students from all India may get complete detail and can register for the events.

Courses Bootcamp

Complete backend for course bootcamp build in NodeJS.
